Kollam,Kerala

I am a passionate Python developer with hands-on experience in designing, developing, and maintaining software applications. I pride myself on writing clean, efficient code and implementing robust database architecture. My experience includes working on diverse projects in dynamic environments, where I've honed my skills in frameworks like Django and gained collaborative experience in version control.

CORE SKILLS

Ajax	Database Architecture
bootstrap	Django
Css	Git
Python	HTML
Javascript	postgresql
Linux	Selenium
MySQL	

PROFESSIONAL EXPERIENCE

Python Developer

06/2023-10/2024

Codesvera Infotech

- Played a key role in an appointment system project by helping implement new features.
- Designed and implemented the database architecture,contributing to ongoing maintenance.
- Gained experience in version control through active participation in the development process.
- Worked on the admin side of a hotel booking application for managing reservations.
- Designed and implemented features for viewing bookings,managing transactions,and creating special offers.
- Optimized the database for efficient data handling and system performance.

Python Internship

Short courses completed include an internship focused on Python at SoftenTechnologies and a course in Web Designing at Keletron Knowledge Center,Trivandrum.

PROJECTS

Booking App

Role: Backend Developer

Technologies : Python, Django, Django REST Framework, PostgreSQL, HTML, CSS, JavaScript

Description :

- Designed and implemented a system where the admin can manage all data in a booking app that supports mobile application operations.
- Features included managing transactions, bookings, offers, and promotions.
- Optimized database queries for faster response times, improving overall system efficiency.
- Independently handled backend development and collaborated closely with the front-end team (Flutter) and UI/UX designers for seamless integration.
- Gained experience in AWS by creating EC2 instances, handling staging servers, and supporting deployment.
- Debugged critical issues and worked effectively across teams to ensure a smooth workflow.

Achievements :

- Successfully deployed the backend for a scalable booking platform.
- Started learning AWS and managed the staging environment independently.
- Enhanced collaboration by bridging gaps between backend and front-end teams.

Appointment-Based App

Role : Full Stack Developer

Technologies : Python, Django, HTML, CSS, JavaScript

Description :

- Contributed to a running appointment-based project by adding new features and improving existing functionalities based on client requirements.
- Worked directly with the client to gather requirements, follow up on changes, and ensure deliverables matched expectations.
- Explored and integrated APIs like Google Calendar API and Distance API to enhance app functionality.
- Gained hands-on experience in AWS by creating EC2 instances, managing the staging server, and handling production deployments.
- Strengthened debugging skills by resolving production-level issues.

Achievements :

- Established strong client communication by managing requirements directly.
- Improved technical expertise in API integration and cloud server management.

Stock Manager

Role : Full Stack Developer

Technologies : Python, Django, PostgreSQL, HTML, CSS, JavaScript

Description :

- Successfully developed and managed a web application for stock management with modules for master records, purchase transactions, and branch-specific inventory tracking.
- Designed and implemented features for adding, purchasing, selling, and disposing of stock items, ensuring accurate and seamless inventory management.
- Automated transaction logging and stock tracking to reduce errors and improve accuracy.
- Integrated real-time stock market APIs for dynamic price updates, enabling better decision-making for users.
- Developed user-friendly dashboards to provide clear insights into stock performance and transactions.

Achievements :

- Delivered a robust stock management system that streamlined inventory operations.
- Improved decision-making for users through real-time stock price updates.
- Demonstrated leadership by automating workflows and introducing efficiency-focused features.

EDUCATION

Diploma in Computer Science Engineering

Yonus College of Polytechnic

09/2020-08/2022 Q Kollam

Higher Secondary (Computer Science)

Svhss Clappana
