As a Software developer, I stay ahead of emerging technologies and seamlessly integrate them into my work to build innovative and efficient solutions. My passion for coding drives me to continuously enhance my skills, embrace new challenges, and push the boundaries of development. I am committed to delivering high-quality, scalable applications while striving for both personal and professional growth in the ever-evolving tech landscape.

TECHNICAL SKILLS

- Programming Languages: Python, PHP
- Web Development Frameworks & Libraries: Django, Django REST, Laravel, ORM, ReactJS, HTML, JQuery, Ajax , CSS,
- Databases: MySQL,
- APIs : REST APIs ,
- Developer Tools: Postman, VS Code, GitHub,

PROFESSIONAL EXPERIENCE

Python Full Stack Developer

Sysol systems Solutions, Kinfra Techno Industrial Park | March 2025 – Present

Formen Health Care – Dialysis Treatment Provider

- Developed a comprehensive web application for Formen Health Care to manage and streamline dialysis treatment processes
- Designed and implemented **RESTful APIs** to support the functionality of the mobile application used by healthcare professionals and patients.
- Collaborated with frontend and mobile developers to integrate backend services seamlessly.
- Worked closely with cross-functional teams to gather requirements and deploy medical workflow-based features in a timely and efficient manner.
- Ensured data integrity and secure communication in line with healthcare compliance standards.

Inssyssol Technologies | November 2024 – January 2025

Python Full Stack Developer

- Developed and enhanced ERP software using the Django framework for the backend.
- Designed responsive, user-friendly interfaces with HTML, CSS, and JavaScript.
- Implemented HR functionalities, including employee management, payroll, and attendance tracking.
- Collaborated with team members to gather requirements and deliver customized ERP solutions.
- Optimized performance through rigorous testing and debugging.

Mdigitz Soft Solutions | January 2023 – June 2024

Python Full Stack Developer

- Built an E-commerce website using Django, MySQL, and JavaScript.
- Designed and implemented an Order Management Application, optimizing database queries and integrating data storage solutions.
- Developed a medical recruitment application using PHP, Laravel and React.js, enhancing the hiring process for healthcare professionals.
- Created reusable React components for a responsive user experience.

One Team Solutions | June 2022 – November 2022

Full Stack Developer Intern

- Contributed to backend and frontend tasks in web development projects.
- Worked on designing and developing web applications using Python, front-end technologies like HTML, CSS, and JavaScript with backend frameworks such as Django.

PROJECTS

Web Application

Developed a web application for Formen Health Care, a multi-center dialysis service provider. The system includes admin, center, doctor, and patient modules with role-based access control. I implemented features for center and doctor registration, doctor-center assignment, patient management, and dialysis slot booking. Also created RESTful APIs for the mobile app to support login, center access, and booking functionalities.

ERP software

Designed and structured all pages using HTML, CSS, and JavaScript, ensuring a user-friendly and responsive interface. Worked extensively on the backend HR module, implementing functionalities such as employee management, payroll, and attendance tracking. Collaborated with team members to gather requirements and deliver customized ERP solutions. Order Application(Python Django) Developed and maintained an E-commerce website, employing HTML, CSS, and JavaScript for the frontend, while leveraging Django for server-side operations and MySQL for data management and REST APIs .

Application Development for Medical Recruitment(PHP Laravel and React.js)

Designed and implemented a robust application using PHP Laravel and React.js to streamline the recruitment process for medical staff, including doctors, nurses, and other healthcare workers.

EDUCATION

• University of Kerala - Bachelor of Commerce (Co-operation) - 2018 - 2022

Neelima Vidhya Bhavan Alappuzha, Kerala

• Higher Secondary HSS Thiruvampady Alappuzha -

Commerce Maths - 60 %

• High School

St.Antony's Girls High School Alappuzha - 75 %
